

HENRY TOTTLE

Holt, Wiltshire · 07709 772422 · henrywilliamtottle@gmail.com · [Portfolio](#) · [GitHub](#) · [LinkedIn](#)

PROFILE

Full stack developer specialising in Django, systems architecture, and production ownership of internal business platforms. Experienced designing and deploying tools that replace manual, paper-based workflows across warehouse and logistics operations, with end-to-end responsibility spanning backend development, deployment infrastructure, and dependency/security maintenance. Background in sound engineering and retail operations underpins strong stakeholder communication and a pragmatic, user-focused approach to technical decisions.

TECHNICAL SKILLS

Languages & Tools: Python, JavaScript, PHP, SQL, HTML, CSS, Bash

Frameworks & Libraries: Django, React, Flask, Bootstrap, Tailwind CSS

Infrastructure & Deployment: Docker, VPS deployment, Celery/Beat, Redis/Valkey, Linux (Arch), Cloudflare

Database: MariaDB, MySQL, PostgreSQL, SQLite

Security & Dependency Management: Snyk vulnerability remediation, dependency/version auditing, network security fundamentals (HackTheBox, internal LAN audit)

Version Control & Testing: Git, GitHub, pytest, Jest, PHPUnit

Other: RESTful APIs, Agile/Scrum, MVC Architecture, Object-Oriented Programming, workflow automation, systems thinking, modular architecture

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer | Glenthams Life Sciences

September 2025 - Present · Corsham, Wiltshire

- Designed and implemented an Internal Stock Transfer (IST) dispatch system used on warehouse scanners, built with Django and JavaScript, delivering a measurable improvement in warehouse throughput and reducing manual handling errors.
- Architected and maintain a Celery-based Stock Sync Pipeline for automated inventory reconciliation, including centralised cache lock handling, volume/liquid unit fallback logic, and expiry-date validation to prevent invalid stock states.
- Implemented a quick order compiler, removing a manual process, reducing compilation time from up to one hour, to under 1 minute.
- Created the Orders and Logistics Activity Dashboard (OLAD) to replace the Django admin view as the primary operational interface, and continue to own its ongoing feature development and accessibility improvements, making independent architectural and data-model decisions as the platform has grown.
- Created Supplier Scoreboard Dashboard and Logistics Master Dashboard which surfaces business data to provide valuable metrics for KPIs, SLAs and more accurate estimated delivery times.
- Hold end-to-end ownership of production deployment to a VPS, including Celery worker lifecycle management, Cloudflare cache, and release coordination, with no senior technical oversight.
- Identified and remediated dependency and version vulnerabilities (Snyk) across the Django stack, including Pillow and Django version issues; conducted an internal network security audit and completed hands-on offensive security training (HackTheBox Meow).

System and Training Lead | Mr B's Emporium

2017 - 2025 · Bath

- Led on internal tech solutions and onboarding of new staff.
- Created comprehensive documentation for internal systems.
- Built custom spreadsheets for event ticketing and sales analysis.
- Supported stock, e-commerce and admin operations as internal IT point of contact.

Library Support Assistant | University of Bristol

2016 - 2017 · Bristol

- Supported a large-scale relocation and cataloguing project.
- Managed workload across departments to meet deadlines.

Deputy Regional Commercial Manager / Senior Bookseller | Waterstones

2013 - 2016 · Bath

- Oversaw commercial activity across the Bath cluster.
- Managed stock, sales reporting, and customer service operations.
- Led store-level staff training and development.

PROJECT EXPERIENCE

Subscriptions Assistant - Full Stack Developer

CakePHP, MySQL, Railway.app

- Custom internal tool to assist monthly book subscription selections by querying business sales data and the Google Books API, including CSV import, tagging, and CRUD functionality.
- Demo credentials available on request.

EDUCATION

Full Stack Track - iO Academy · 2024

- Intensive 16-week bootcamp covering full-stack development and Agile methodologies; acted as Scrum Master for teams of 8 and 3; built 7 individual and team projects; earned Agile certification.

BSc (Hons) Music and Sound Technology - University of Portsmouth · 2013

A-Levels: Chemistry, Physics, Music Technology - King's College Taunton, 2008

AWARDS & INTERESTS

Agile Certification (2024), BSAC Sports Diver (2006)

Guitar tone exploration, reading sci-fi, cycling, family time.
